Summary Introduction to the CCS Web-based Curriculum

Welcome to our web-based curriculum. Whether you have been hired as a new CCS worker, or if you are a human services worker who wishes to know more about behavioral health issues, you will find some valuable basic information in these web-based modules. These modules were designed to provide a foundation that you can take with you into classroom training and on-site orientation. Please note: They are not intended to replace formal education, training and Supervision, merely to compliment those processes.

If you are already practicing, we hope you will find the information useful in helping you enhance your practice through exposure to these concepts. If you have questions or comments about the modules, we welcome them. Please contact us at (920) 465-2101 or email bhttp@uwgb.edu.

The chapters in each module are arranged in sequential order, so please follow that order.

Each module also has a quiz. You must take the quiz at the end of each module and get a score of at least 80% in order to move onto the next one. You will be allowed to retake the quiz until your score reaches 80% or higher. It is recommended you go back and review the material prior to attempting the quiz again. Once you have successfully completed the quiz, you may move on to the next module.

When you have completed all the modules, you will receive documentation that you have completed the 16-hour web-based course. It might take several days for your completion to be processed. If you have any questions or concerns, please contact the Behavioral Health Training Partnership at (920)465-2101.

Table of Contents

| | |
|--|---|
| Recovery Concepts and Principles | 4 |
| Person-Centered Planning | 1 |
| Trauma Informed Practice | 7 |
| Schizophrenia Module | 4 |
| Affective Disorders Module | 4 |
